

MONOGRAPH #1408

QUANTUM CARE R & D LLC

BIOTHERIC TAPE

Something Completely New

In discussing energy medicine it's always important to not forget about trauma. Trauma is something we don't usually think about till it happens. As we all know, the body is a self-healing mechanism, and, usually healing is complete after some kind of trauma.

However, there are two areas to consider: is it possible to actually "accelerate" the healing response. And, what happens when the healing is not complete. There are numerous reasons why a healing response could be incomplete and are too numerous to cover here. Usually, some form of pre-existing tissue toxicity, or, a nutritional deficit of some kind was present before the trauma occurred.

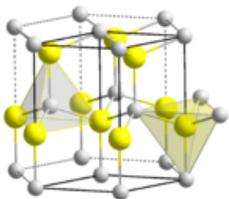

Obviously, when someone has experienced an incomplete healing, or, when someone feels their healing response needs accelerating, it's not appropriate to lecture them on why their diet was somehow lacking before their injury: not too helpful.

Energy Medicine can give us lots of options, again, too numerous to list here. However, one of the easiest and simplest ways of affecting the energy field of a particular injured part is by adding in torsion field based information that can act as a blueprint for the body to lend energetic assistance to the self-healing mechanism of the body that we mentioned before.

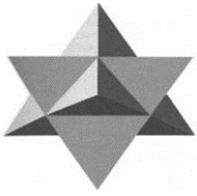

Quantum Care R & D has found an answer. It's very High-Tec, but simple and inexpensive to use. The product comes in the form of tape, which can be simply cut to size and placed over the affected area. The tape we are using at the moment is called zinc oxide tape. So why zinc oxide? First of all, zinc oxide tape is not expensive and is therefore economical for anyone to use. But more importantly, consider the

actual crystal shape of zinc oxide for a moment.

The zinc oxide crystal usually has a hexagonal shape. Within this shape, sometimes referred to as the Wurtzite structure are two perfectly formed

ZINC OXIDE WAS INVENTED IN 1944 AND I DON'T BELIEVE THERE HAS BEEN ANY IMPROVEMENT ON THIS SIMPLE INVENTION, UNTIL NOW! IN THIS MONOGRAPH YOU WILL LEARN THAT ZINC OXIDE CRYSTALS HAVE A LITTLE SECRET TO SHARE WITH US, AND IT HAS TO DO WITH ENERGY MEDICINE, THE SACRED MERKABA, THE KEY OF LIFE, AND SECRETS OF THE UNIVERSE. THINK I'M EXAGGERATING? TAKE A LOOK AT WHAT I DISCOVERED ABOUT THIS AMAZING CRYSTAL'S POWER THAT HAS BEEN UNLOCKED BY THE INCREDIBLE POWER CALLED CRYSTAL IMPRINTING

tetrahedrons. You may recall studying the Merkaba. The Merkaba is two tetrahedrons inverted and superimposed upon one another.

This, combined with the fact that this crystal has piezoelectric properties lends itself perfectly to a process called imprinting. A very special alteration is simply made to tape that has a zinc oxide coating. This alteration involves a complex subtle energy restructuring that allows the crystals to “hold onto” the information that has been downloaded so to speak. Then, when you place a piece of this tape over an injured area, this is read by the before-mentioned self-healing mechanism of the body. The tape has no physical effects, but basically imprints into the biotheric field. This can have the effect of accelerating the healing process, or, reigniting or stimulating the healing response for those who have sustained an injury that has not fully healed for whatever reason.

On the strict physical level (not the biotheric level), zinc oxide has had a huge presence in the medical field: ointments, lotions, creams, sunscreen, and as an anti-bacterial. (for instance, zinc oxide nanoparticles can enhance the antibacterial activity of Ciprofloxacin in fighting potentially dangerous staph infections).

Quantum Care R & D, LLC does not use zinc oxide in this way. We use it energetically to assist the already present God-given, self-healing mechanisms of the body. Our tape can be placed on the skin, on top of a cast, on top of clothing, or on other pre-existing bandages that may be present.

In sports, Biotheric Tape can be used in any area where zinc oxide tape would be normally used.
